SUBJECT: Taking Inventory

Hello Circle For The Protection of Antarctica (CPA),

Our team drafted up a table with the hostnames, ip addresses, operating systems, and critical services on each device in our topology. They are listed below in a table format sorted by IP address. We have a secondary table with users and their permissions across local and domain systems. Finally we have a topology overview of all our machines. If there is any more information on the topology you should need, please let our team know and we can provide it as soon as possible.
